

## Artificial Eye Measurement Performed on 10-Jan-2019

Artificial eye measurements in three trials. The duration of each trial is 10 seconds.

	Vert.	Horiz.	Sum X
1st Measure	1.362	1.385	1.262
2nd Measure	1.116	1.350	1.021
3rd Measure	0.272	0.279	0.250
avg. (horizontal)	0.224	0.254	0.204
1st Measure	1.362	1.779	1.447
2nd Measure	1.116	1.461	1.078
3rd Measure	0.270	0.300	0.280
avg. (horizontal)	0.224	0.282	0.216

Figure 1: Standard deviation in horizontal and vertical axis.

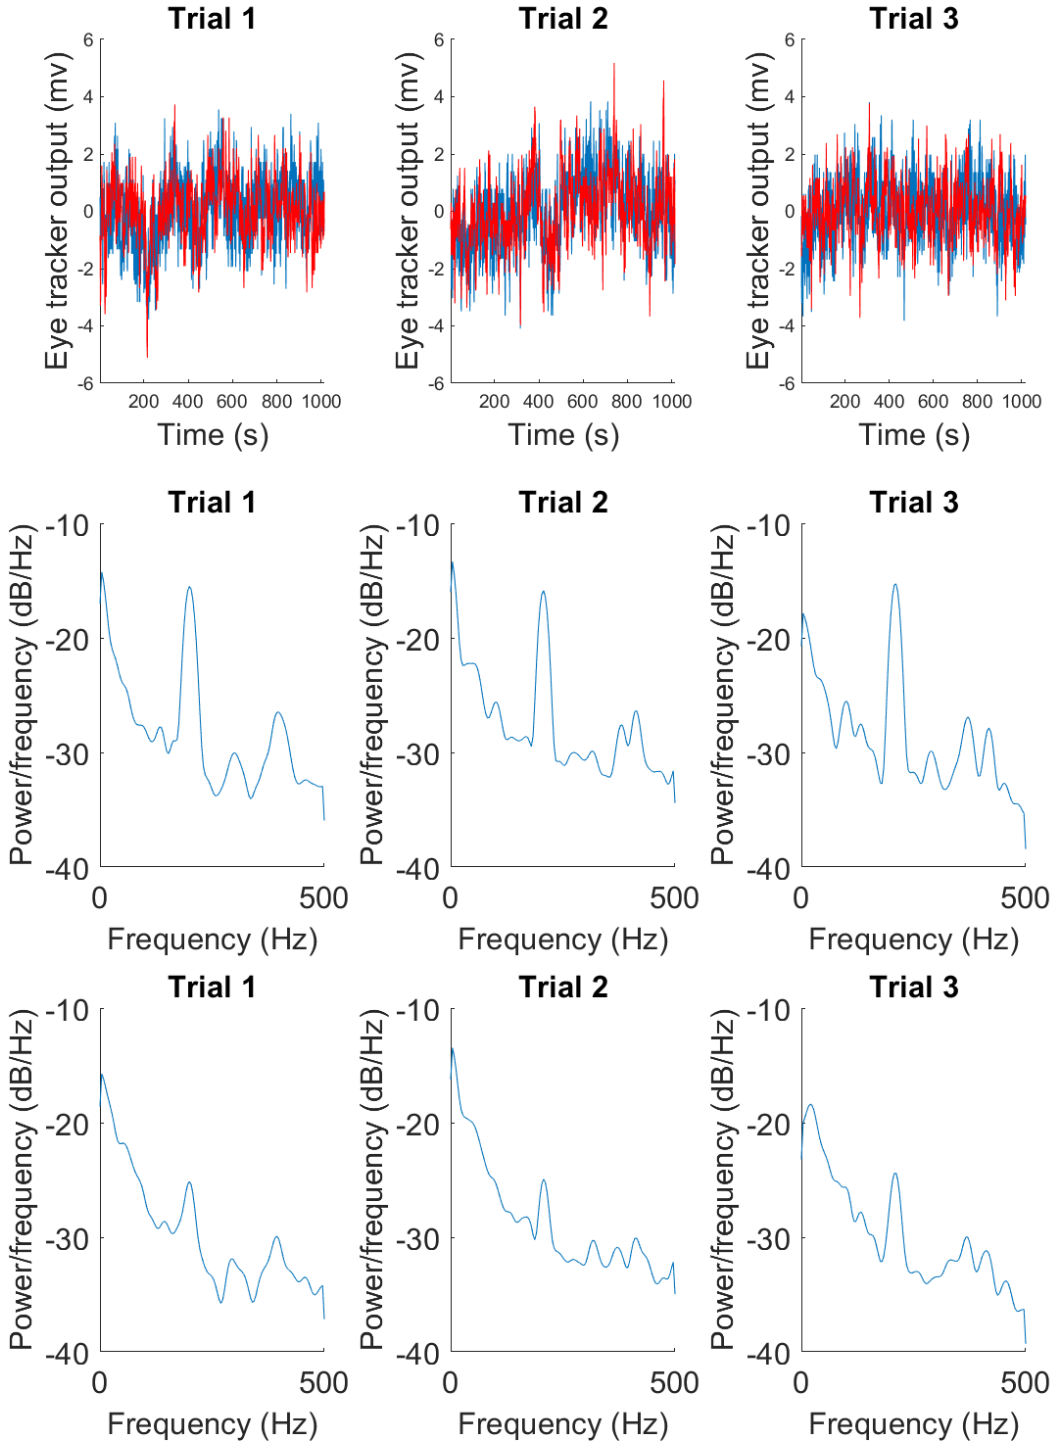

Fig. 2. Eye tracker output (mv) vs Time (s) (top row) and Power/frequency (dB/Hz) vs Frequency (Hz) (middle and bottom rows) for three trials.

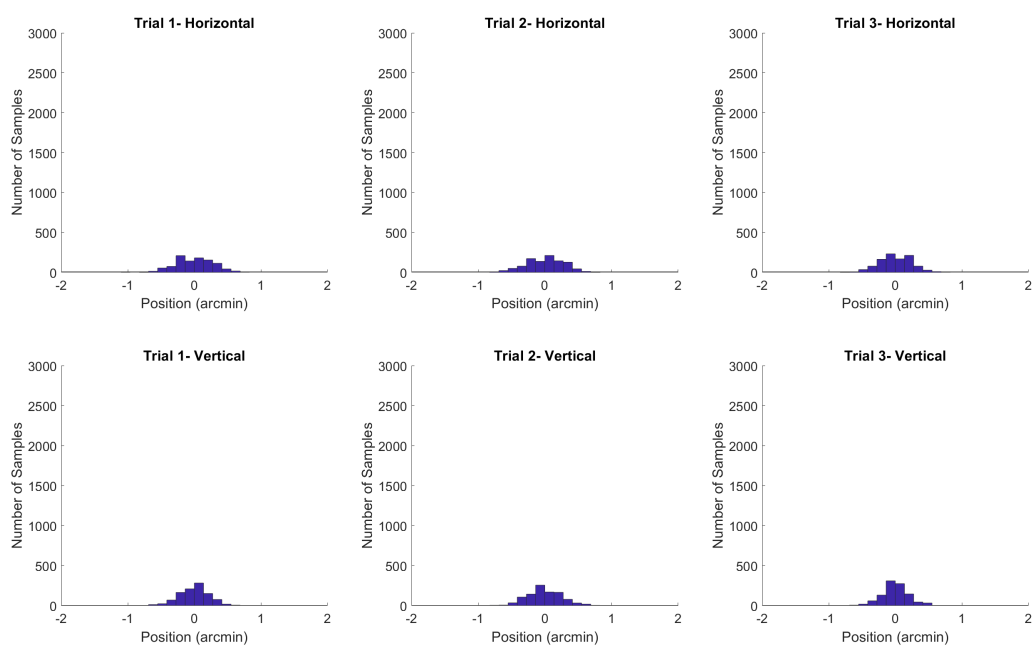

Figure 3: Distribution of the eye tracker output in horizontal (top) and vertical (bottom) axes. Each column refers to one trial.
