

## Artificial Eye Measurement Performed on 16-Apr-2014

Artificial eye measurements in three trials. The duration of each trial is 10 seconds.

	Trial 1	Trial 2	Trial 3
Mean_Hor	0.03991	0.03911	0.03859
Mean_Ver	0.11256	0.11427	0.11643
Std_Hor	0.00109	0.00111	0.00116
Std_Ver	0.00176	0.00141	0.00157

Figure 1: Mean and standard deviation in horizontal and vertical axis.

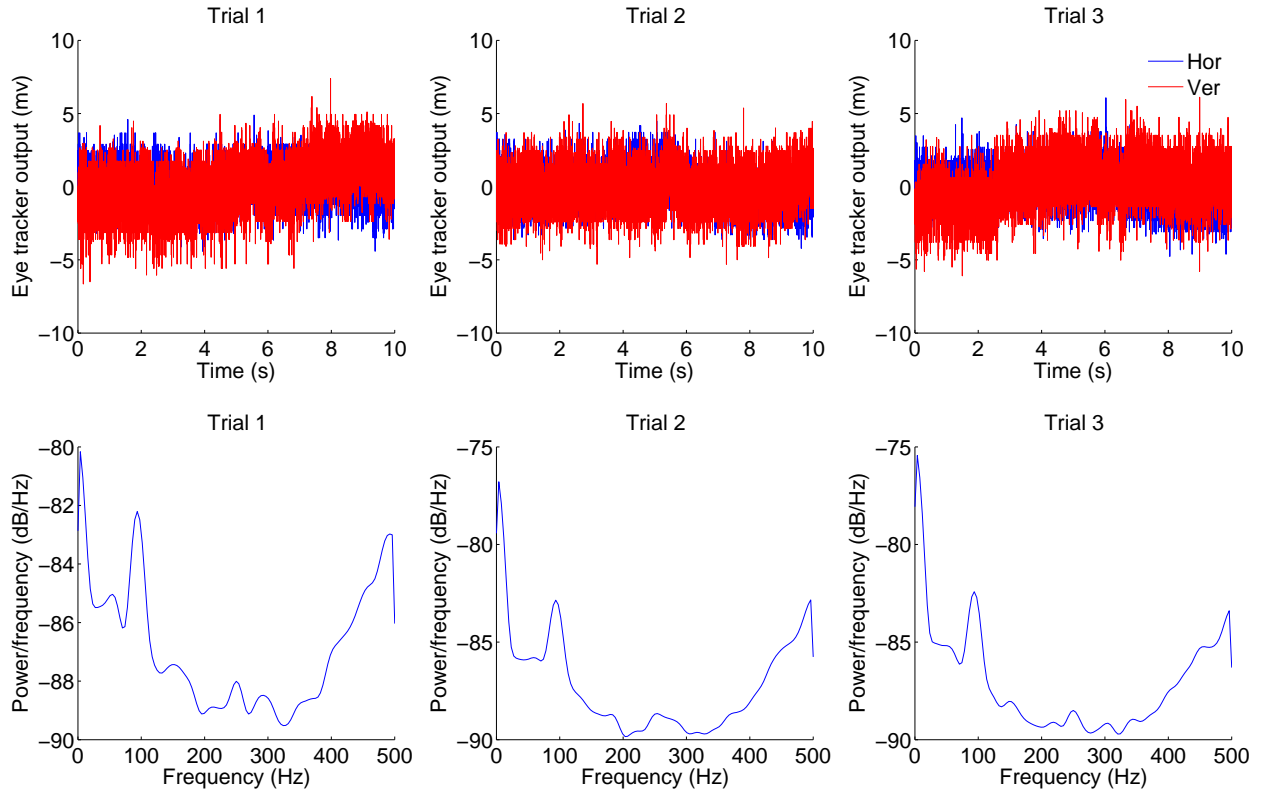

Figure 2: Top row represents the eye tracker output in horizontal and vertical axis for each trial. the bottom row are the PSD of the output calculated by Welch method. Each column refers to one trial.
