

## Artificial Eye Measurement Performed on 17-Apr-2014

Artificial eye measurements in three trials. The duration of each trial is 10 seconds.

	Trial 1	Trial 2	Trial 3
Mean_Hor	0.07509	0.07516	0.07496
Mean_Ver	0.15420	0.15471	0.15598
Std_Hor	0.00126	0.00129	0.00126
Std_Ver	0.00146	0.00152	0.00155

Figure 1: Mean and standard deviation in horizontal and vertical axis.

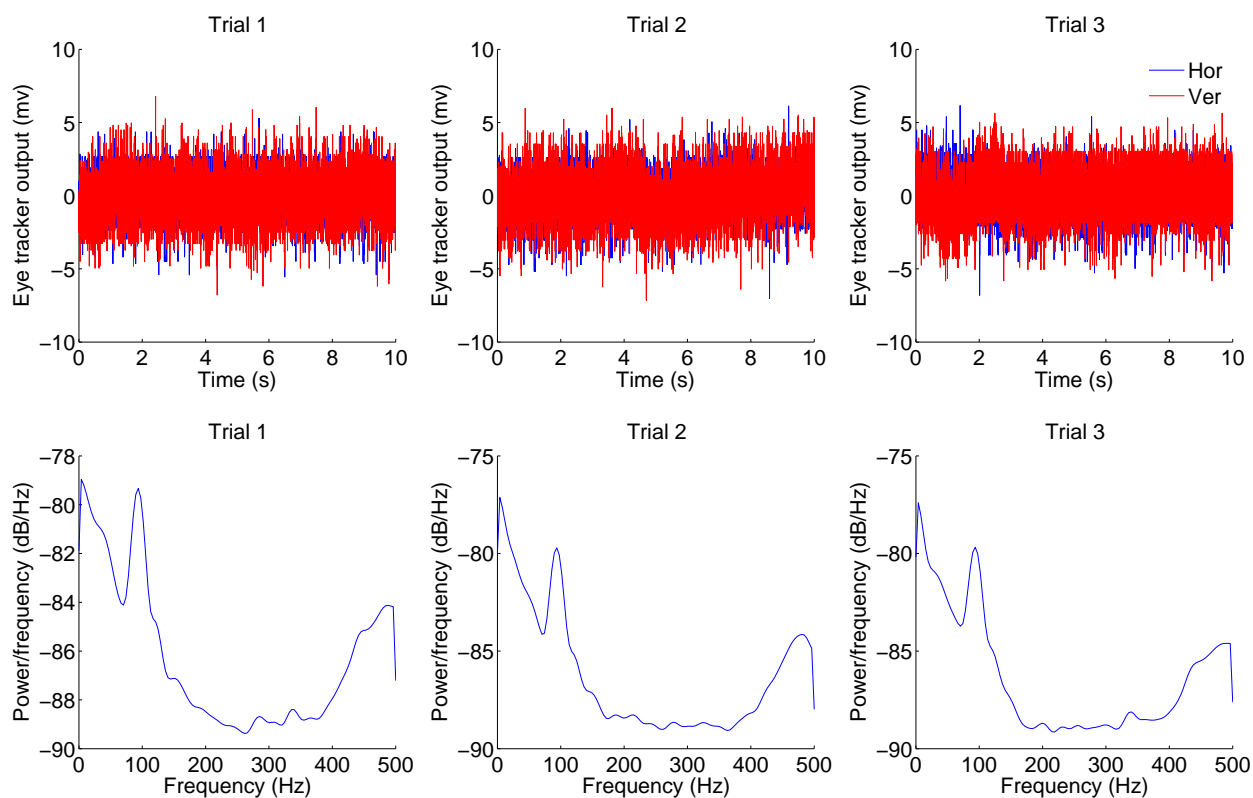

Figure 2: Top row represents the eye tracker output in horizontal and vertical axis for each trial. the bottom row are the PSD of the output calculated by Welch method. Each column refers to one trial.
