Subjects Needed for Research Experiments on Head and Eye Movements

High-resolution Measurement of Head and Eye Movements PI: Michele Rucci, PhD

The Active Perception Lab at the University of Rochester investigates the roles of head and eye movements in visual perception.

All experiments will use an Oscillating Field Monitor, a head-tracking cap, and eye coil contact lenses

Experiment sessions will last 1 hour (1 to 3 experiment sessions per experiment)

Subjects will be paid \$50 for their participation.

Requirements:

You must speak and read English
You must be at least 18 years old
You must have normal vision (with or without correction)
You must not have astigmatism or other vision deficits
